

ONE CAMPUS. ONE COMMUNITY.

The Waterloo Community School District is exploring the construction of a new high school that would bring all high school students together at a unified campus by 2028.

No property taxes would be used to pay for the new high school. Instead, funding will come from SAVE, which is the existing one-cent statewide local option sales tax.

We believe this will:

- Provide academic opportunities for all high school students
- Increase competitiveness in areas like career readiness, extracurricular activities, and teacher recruitment
- Create operational efficiencies through modernized facilities, streamlined operations, and sustainable infrastructure

COMPARE THE COMMUTES
